

# ETHERTOWN POLYTECHNIC

*Fall of Firewalls Term – Course Catalog*

---

A Magical Technological Curriculum for Cyber Mystics and Infrastructure Dreamers

## ■ **SYS-303: Directory Mysticism & Cloud Sorcery**

Master the sacred flow of user control, policy enforcement, and hybrid cloud rites.

Includes: Active Directory Fundamentals, Azure VM rituals, hybrid identity forging.

Tools: TryHackMe, Microsoft Learn, VirtualBox (optional), Kerberos dreams.

## ■ NET-202: Network Cartography & Protocol Alchemy

Trace the packet. Decode the sacred ports. Design your own ritual topology.

Includes: Subnetting, TCP/IP, DNS, Wireshark divination, Nmap invocations.

Tools: TryHackMe, Google IT Support (Networking), CLI, brainwaves.

## ■ SEC-404: Cyber Sigils & The Art of Defense

Understand the CIA triad. Listen to the logs. Banish the unknown actors.

Includes: Threat modeling, log prophecy, incident response, access control magic.

Tools: TryHackMe, IBM/Google Cybersecurity Courses, SIEM simulators.

## ■ Bonus Electives (Zine-Approved)

- SOC-777: Panic in the Server Room – Dramatic reenactments of incident response gone wrong.
- LIN-1313: Bash Scripting as Poetry – Write your feelings into cronjobs and automation spells.
- ZIN-404: DIY Cyberzines – Learn to make hand-bound security zines with ASCII runes.
- VIS-666: Surveillance as Folk Art – Explore analog camera rituals and haunted machine vision.
- HIS-313: Forgotten Protocols – Telnet, Gopher, and the spiritual ancestors of cyberspace.

*Signal ends. Term begins.*
